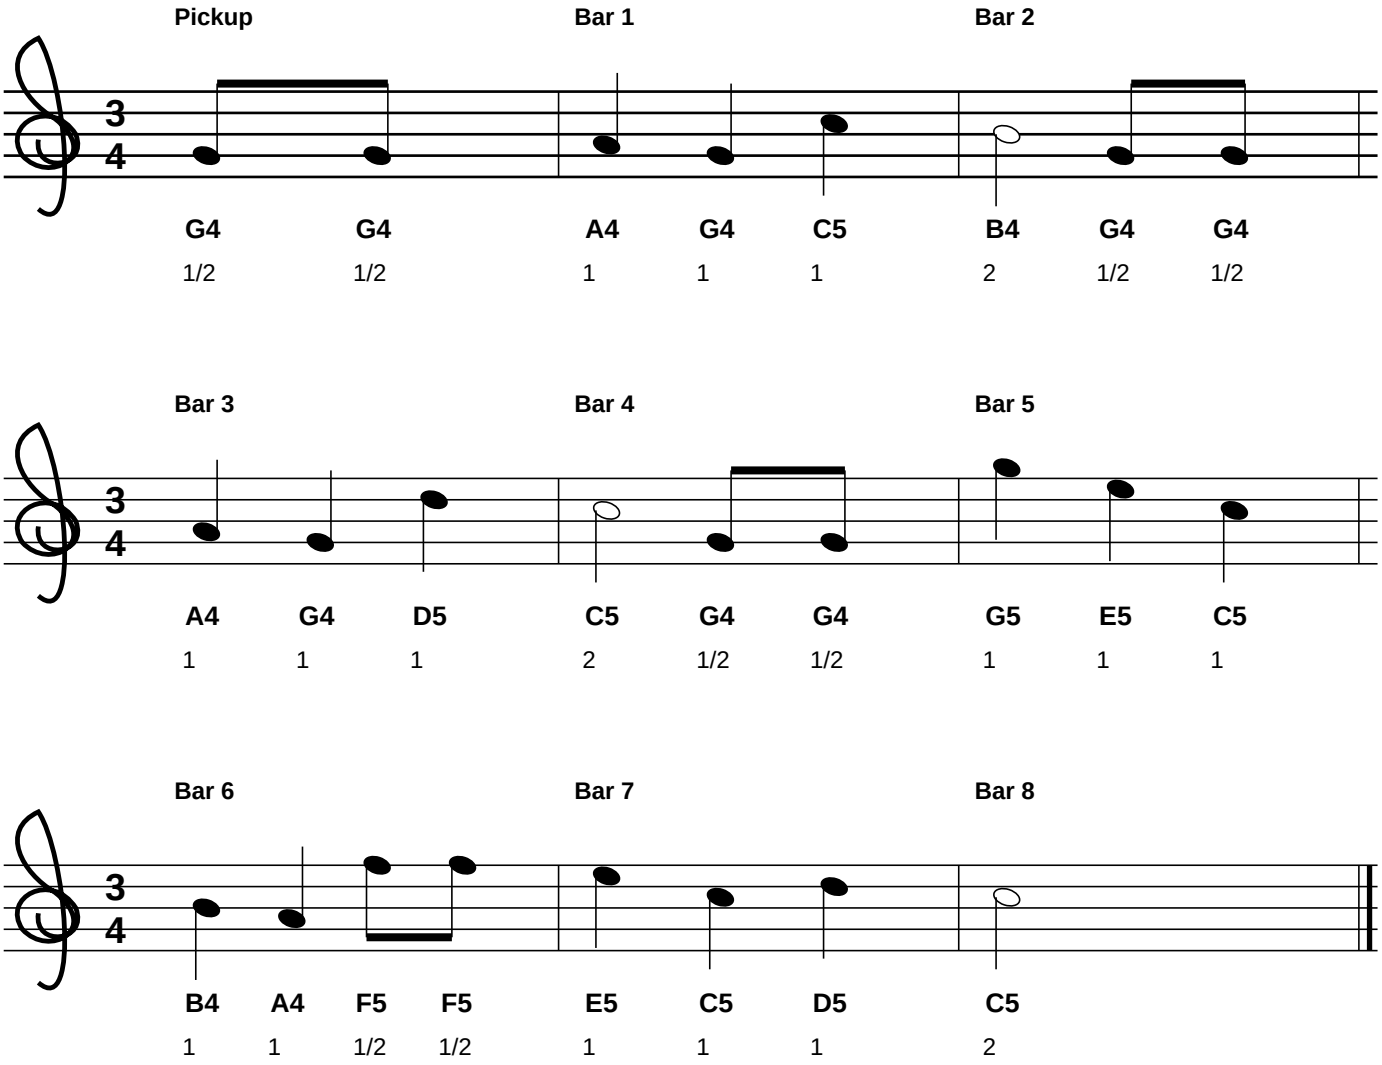
HAPPY BIRTHDAY

Read the music. Find the notes. Program your buzzer.

C major | Treble clef | 3/4 time | Quarter note = 100 beats/minute

Read left to right. Note labels match the Arduino code exactly.



Labels below the staff: pitch name, then length in beats.

THE MUSIC-TO-CODE KEY

Eighth note = 1/2 beat -> value 8 | Quarter note = 1 beat -> value 4

Half note = 2 beats -> value 2. A hollow notehead shows a half note.

Example: {NOTE_G4, 8} plays G4 (392 Hz) for half a beat.

G4 and G5 share a letter; G5 is one octave higher. C4 is middle C.

Each full bar has 3 beats. The pickup has 1 beat; the last bar has 2.

Clap the rhythm, say the note names, then find them in melody[].
